CALL FOR INTEREST

APC Climate Collective

Together, we can tackle the complexity of climate action better. The APC Climate Collective gathers philanthropists like you to find meaningful entry points to address climate change causes and impacts, especially in Asia.

Through the APC Climate Collective's flexible programme, members can take part in robust learning opportunities, collaborate with seasoned experts with demonstrated impact in the climate space, and find new opportunities to work together with fellow APC members to address climate change.

Whether you're starting out in climate philanthropy, looking to scale existing efforts, or keen to support new and innovative solutions, the APC Climate Collective enables you to choose which ways best suit your own anchors for climate philanthropy. It's a space for experimentation and possibility.

Launching in June 2021.

Participation

Participation in the initial phase will be limited to 8-10 members to ensure a meaningful programme. The Climate Collective is planned for launch in June 2021.

The APC Climate Collective will be a **two-year commitment** for members, with expected member contributions of **S\$10,000 per annum**. This helps to defray our costs, including hiring a full-time Programme Lead, who will be a shared resource and will coordinate the Collective's activities, provide ad-hoc research and act as an external liaison for ecosystem-building support.

Contact

We invite our members to send expressions of interest to participate in the APC Climate Collective by **1 April 2021**.

To send in your expressions of interest to join the APC Climate Collective, or for further information on the initiative, you can reach out to:
